A Course in Engineering Concepts and Problem Solving

June 21, 2002

The materials presented here represent and support the Johns Hopkins University course What is Engineering? They are far from complete. Some chapters are unfinished or appear in their original Word format. Others have already benefited from embellishments which include instructional design, animation, and visuals. All labs, projects, questions/problems, and references which pertain to the course are also included in some form.

HOW TO NAVIGATE

1. To get to the HOMEPAGE click on the squares under the What is Engineering? banner. You will be able to return to the homepage anytime during the program from PAGE ONE of the unit or activity. In the Word versions, you will be able to return to the HOMEPAGE from the title on PAGE ONE of each document.

2. From the HOMEPAGE, click on the name to get to any of the chapters or activities.

3. Now you are ready to click on the squares to get to the HOMEPAGE.
