A post-doc position is available for an experienced and highly motivated candidate with a background in environmental science to join the Fairbrother research group at Johns Hopkins University (http://pages.jh.edu/~chem/fairbr/). Applicants should hold or expect to hold a PhD degree in Chemistry or Environmental Engineering. Opportunities exist in several areas related to the fate of polymer nanocomposites in the environment and/or the properties and behavior of well characterized environmental interfaces. Some prior experience in surface analytical methods (SEM, TEM, AFM XPS, IR etc.) techniques is desirable.

Full applications including curriculum vitae, a brief summary of past, current and future research interests and accomplishments, selected publications, two to three references and expected availability date should be submitted to: Howard Fairbrother (howardf@jhu.edu)
