EDITORSHIP

International Studies Compendium Project is a publication of the International Studies Association, designed to address a perceived need for comprehensive reviews of the development of the literature in a given area, as well as a focused discussion of current themes. Compendium essays are designed to allow students, scholars, and practitioners to be brought quickly up-to-date on the nature of questions asked, past attempts at formulating responses, and the current state of debates in a given issue area. The Compendium comprises the *International Studies Encyclopedia* (2010), which is a multi-volume reference publication; *International Studies Online*, a periodical which includes all the entries of the *Encyclopedia* as well as new and updated entries; and planned volumes for specific subfields. My leadership in this project includes:
